Term	Definition	Diagram
acute angle	measures less than 90°	A acute triangle	a triangle with only acute angles	D
adjacent angle	Angles in the same plane that have a common vertex and a common side.	H ✱ angle	formed by two rays that begin at the same point or share the same endpoint	
complementary angle	two angles whose measures have a sum of 90°	I ✱ congruent angles	Angles that have the same measure.	
equilateral triangle	a triangle in which all sides are equal	L isosceles triangle	a triangle with at least two congruent sides	N obtuse angle	measures more than 90°	C obtuse triangle	a triangle with one obtuse angle	G
right angle	measures exactly 90°	B

right triangle	a triangle with one right angle	F
scalene triangle	a triangle with no congruent sides	M straight angle	measures exactly 180°	J
supplementary angle	two angles whose measures have a sum of 180°	E vertical angle	A pair of opposite congruent angles formed by interesting lines.	K
